Office Action Summary

Art Unit: 1773

1. Claims 18 and 24 are generic to a plurality of disclosed patentably distinct species comprising magnetic particles selected from a first Markush group in combination with a matrix material selected from a second Markush group. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (i.e. select a single combination of one member from each group) even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

See MPEP 803.02, 808.01 (a), 809.02 (d)
